Sales Quantity:

2013 Year -----1000 Sets

2014 Year -----1300 Sets

2015 Year -----1500 Sets

2016 Year -----1700 Sets

2017 Year ----- 1600 Sets (From 6th January to 29th Sep)

After 20 years developing, RuiJun brand has gone into customer's heart deeply, die manufacturer knows it is easier to get orders from clients if they use RuiJun machine, this is our RuiJun brand, who can effect die maker's decision from their customers' suggestion.

We can sell out 9 sets machine every day on the first two month of 2017 (one work hour one set), many small factories' annual sale quantity can not catch up RuiJun monthly sale quantity. Many factories arranged their Factory

Managers coming to find out the reason. But we think the reason is coming from the users, not coming from the factory. Because many customers told us, their clients will not give the die orders to them if they do not use RuiJun machine to make dies, that's why they buy our machine.

Our machine has some features as follows:

- 1). If you have ten sets RuiJun brand machine,when you make a die, no matter which machine make this die, the size will be exactly the same, one of our customer said, other brand is not exactly same, they have some small difference. (He has about 40 sets wire cut machine, 30 sets are Ruijun brand, and another 10 sets are from 3 different manufacturers)**
- 2). RuiJun brand machine can make a die with perfect surface finishing very easily, while other brand is not easy .**
- 3). Even the die thickness is more than 200mm, we can still make a good surface finishing, while other brand is difficult if the thickness is too big.**
- 4). We have key-technology, we do not like to tell customer how better motors we are using, how expensive accessories we are using, unless we do not have core technology, unless we are not popular in the market.**

What we want to say, we have more experience, we are more professional, that's why we are more popular.
